

Pautas para el uso de IA

con base en Cleland et al. 2025

12-8-2026

1 Las herramientas

1 Las herramientas

- Las herramientas de **inteligencia artificial generativa** operan por doquier.
- P.ej. ChatGPT, Claude, Gemini... Desde ~2022 al alcance de público sin preparación técnica.
- Evolución meteórica: Anthropic no ha publicado su *Mythos* por temor a su poderío.

Cómo opera las IAgen

Implementan 'modelos inmensos de lenguaje' (LLMs)

- 1 Prompt “En un lugar de la Mancha, de cuyo. . .” intenta predecir lo que sigue.
- 2 Cómo: pondera prob. c/ posible palabra con base en su “aprendizaje”.
- 3 Aprende (*training*) con textos digitalizados
→ plagio masivo.

From Wikipedia, the free encyclopedia

The *New York Times Co. v. Microsoft Corp. et al.* is a copyright infringement lawsuit filed by *The New York Times* (NYT) against Microsoft and OpenAI in December 2023.^[1] The lawsuit alleges that OpenAI trained its artificial intelligence (AI) models on NYT content without authorization and that OpenAI and Microsoft's products can reproduce portions of copyrighted articles, which the *Times* states competed with its journalism.^[2] According to the *Times*, it is the first major news organization to sue OpenAI and Microsoft for alleged copyright infringements.^{[3][4]}

El quehacer académico

- Generas conocimiento a partir del conocimiento de otros
- Das crédito a quien merece crédito
- Por ética y para darte credibilidad: nadie inventa el hilo negro

Integridad académica: quieres

- evitar que tus datos sean fabricados por IAgén
- y que el resultado sea pensamiento de la IAgén

Preocupaciones prácticas

fabricación que arroje un patrón falso que se 've bien'

sesgos ¿fue representativo el entrenamiento?

privacidad hurtan todo lo que le planteas

2. Who are we?

As authors, we approach this Guide from a variety of intersecting positions. We are all knowledge producers in health professions education research (HPER); therefore, we seek guidance on how to navigate the benefits and limitations of GenAI, and how to use it transparently and responsibly in our own research. We

3. What is responsible use of AI in publishing?

We are not arguing for or against scholars' using AI, nor are we debating the appropriate usage of AI [\[22\]](#). Instead, we propose that, while GenAI use can speed up drafting, editing, and idea generation, it does not change the fundamentals of scholarly accountability. Human authors remain fully responsible for the accuracy, originality, and integrity of all journal submissions, whether their manuscript was created with or without AI assistance. As Eva argues, the discussion about responsible use of AI in publishing 'boils down' to the need for human oversight [\[23\]](#), which has implications for authorship, verification of materials, and how

4. Why disclose AI use?

Why is it important to disclose GenAI use in research production? Fundamentally, this comes down to transparency, integrity, and accountability. This implies that, instead of focusing on whether AI tools have been used, authors should focus on how much assistance the AI tools provided, what Jenkins and Lin [\[29\]](#)

Siempre declaren cómo usaron la IAgen. **Siempre**

Declaration

In preparing this AMEE guide, we used ChatGPT v5 (OpenAI) in two main ways. First, we generated an initial outline based on our first group meeting, which we then adapted, expanded, and restructured through ongoing team discussions and rounds of editing, to create our own outline prior to drafting the paper. Second, during drafting and revision of the manuscript, ChatGPT v5 was used for targeted polish tasks, including improving sentence clarity, enhancing transitions between paragraphs, and refining wording for precision and readability. All AI-assisted edits were reviewed, verified, and, when necessary, further revised by members of the author team, who all maintain full responsibility for the final content of this AMEE Guide.
